## Inclusivity Indispensable for Credibility of Global Leadership

Indian Prime Minister Narendra Modi, in his address at the first meeting of the G20 Finance Ministers and Central Bank Governors, said that global economic leadership can win back the confidence of the world only by creating an ‘inclusive agenda’. He further exhorted the gathering to have the world’s most vulnerable sections at the centre of their discussions. PM Modi’s thrust on inclusivity is in line with the theme of India’s G20 Presidency - ‘One Earth, One Family, One Future’.

As the world grapples with the fall-out of the war in Ukraine, supply chain disruptions, soaring food prices, there is an omnipresent risk that vulnerable sections could fall behind further. Hard earned progress on Sustainable Development Goals (SDGs) stands threatened by the events which have shaken the world since 2020. Since India assumed the G20 presidency, it has made earnest efforts to give the forum’s working a representative character. India hosted the ‘Voice of Global South’ summit in January, 2023 to provide a platform for representation of collective concerns of the Global South. Several working group meetings, under the Indian G20 Presidency have reiterated the importance of policy solutions which promote inclusive growth, straddling across regions and target groups.
